Experience

Quansight

Software Engineer

October 2019 – Present

- Consulting on client projects and training in the Python data science stack.

Recurse Center

Participant

May 2019 – August 2019

- Transitioned from academia to industry by attending a self-directed educational retreat.
- Learned the Rust programming language by blogging about incrementally building a Rust CLI application.

National Center for Supercomputing Applications

Research Scientist

May 2017 – April 2019

Postdoctoral Researcher

August 2015 – April 2017

- Primary maintainer for The yt Project, an open toolkit for working with 3D simulation data.
- More than 850 merged pull requests for yt alone. Many others merged in popular open source projects such as Matplotlib, Mercurial, xonsh, conda-forge, Homebrew, h5py, IPython, ipywidgets, and nbconvert.
- Triaged code review tasks and issue reports. Planned and led user workshops and developer sprints.

Projects

unyt

<https://github.com/yt-project/unyt/>

- A Python library for working with data that has physical units.
- 100% test coverage along with extensive documentation for use as a command-line helper for quick calculations and as a component of a larger Python project.

Improved support for particle data in yt

<https://ytep.readthedocs.io/en/master/YTEPs/YTEP-0032.html>

- Improved performance and memory usage for common analysis tasks by 10x to 100x by leveraging a novel system for spatially indexing particle data via EWAH-compressed Morton codes.
- Enabled production data pipelines leveraging gigabyte and terabyte scale simulation outputs.
- Presented work to community at a SciPy conference talk.

PlotWindow Plotting Interface

<https://yt-project.org/doc/visualizing/plots.html>

- Created an interface for visualizing slices and projections in yt by wrapping Matplotlib.
- Enables quick data visualization through an API that focuses on what the simulation data physically represent rather than how they are laid out on disk.
- Used in dozens of published journal articles written by yt users.

Skills

Python, Cython, C/C++, Rust, NumPy, Matplotlib, Jupyter, Git, GitHub, Mercurial, L^AT_EX

Education

University of California Santa Cruz

Ph.D. Astronomy & Astrophysics

August 2011 – July 2015

University of Colorado Boulder

B.A. Physics, *Summa Cum Laude*

August 2005 – 2009
